

Side Impact Moving Barrier
According to ECE R95 Regulations
Code 2HB-A1

- Side impact moving barrier for tests according to ECE R95 regulations
- Calibrated center of gravity and moment of inertia (optional)
- Height of front shield adjustable
- Integrated brake system, acting on each of the four disk brakes

Technical Specifications (approximate values)

Overall length (no deformation element mounted)	3,889 mm
Overall width	1,730 mm
Overall height	840 mm
Crash weight	950 kg
Wheel base	3,000 mm
Tire tread width	1,500 mm
Position of center of gravity behind front axle	1,000 mm
Position of center of gravity left of longitudinal axis	0 mm
Position of center of gravity above roadway	500 mm
Distance between front face of ECE R95 impactor and the center of gravity of the barrier	2,000 mm
